'Floating' accessibility button:

- Supports being dragged by user and moved to anywhere within the visible page.

Simple example index.html page:

- Provides basic content that can easily showcase the functionality of the 'Accessibility Panel'.

Full view of Accessibility Panel

Accessibility Panel:

- Can appear either on the right or left side of the screen (depends on the location of the accessibility floating button).
- Contains six working features, each transforming the content within 'index.html' in a unique manner.
- Search bar and language drop-down menu are placeholders yet they can be interacted with.
- 'Reset Settings' button restores each feature to their default state.

All features toggled 'ON' or set to the highest value
